RIGIDS

THE LOOK OF WOOD, THE LOVE OF VINYL

What other brands consider “premium” is standard at Rigids. Our vinyl floors combine style, comfort and technical innovation. With up to **21 dB of noise reduction**, they are among the quietest on the market - perfect for those who value peace of mind and home quality.

Whether you’re building or renovating, prefer modern or classic, Rigids is durable, water-resistant and easy to install.

Discover how quiet living can be.

WHY

CHOOSE OUR VINYL FLOORING?

LUXURY AS STANDARD. WITHOUT THE PRICE TAG

We're happy to reiterate: what other brands call "premium" is standard at Rigids. Our floors start with a **wear layer of 0.55 mm** - a feature often found only in competitors' more expensive lines.
And we go even further: most of our collections feature a **0.70 mm wear layer** for extra durability.

Don't choose between standard or luxury. Choose both. At a fair price.

Our **0.55 mm collection**:

- The **most widely used click system (2G)** on the market
- Up to **19 dB of noise reduction** if noise is not an option
- A **brushed wood texture (wood grain)** that feels like real wood
- Always **long and wide planks** - no narrow or short sizes
- **Integrated & sound-absorbing underlay** (not even standard at certain quality brands)

For those who want even more, our **0.70 mm collection**:

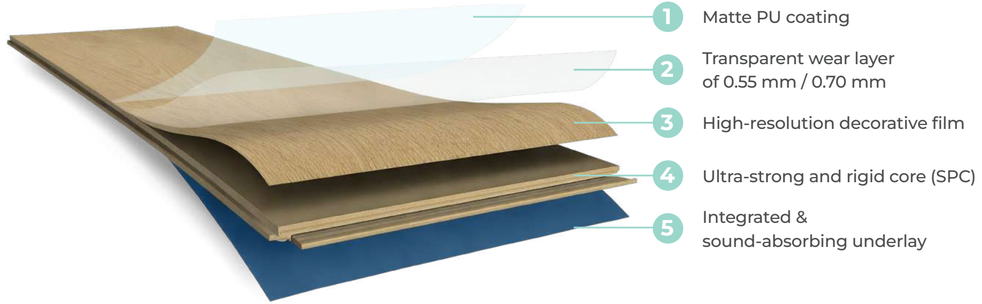

- The **most user-friendly click system (5G)** on the market
- Up to **21 dB of noise reduction** for whisper-quiet living
- The wood texture **you feel** corresponds to **what you see (EIR)**
- Always **long and wide planks** - no narrow or short sizes
- **Integrated & soundproof underlay**
- And of course: elegant **herringbone** patterns with **Unizip click system**. No left and right planks, which means **less cutting waste**.

WHAT IS VINYL FLOORING?

Vinyl flooring is an innovative flooring solution that combines the warm look of real wood with the practical benefits of vinyl. It consists of multiple layers, including a strong wear layer, a realistic wood texture and a stable core.

The result? A floor that looks like parquet but is waterproof, scratch-resistant, easy to maintain and comfortable. Thanks to the handy click system, vinyl floors can be laid quickly and dust-free, even over existing floors.

Perfect for any interior and any room.

THE BENEFITS OF RIGIDS

STRONG IN ANY SITUATION

Rigids is rugged vinyl flooring with a stable core, extra-thick protective layer and stain-resistant topcoat. It can effortlessly withstand impacts, stains and everyday life.

Why? Because a party, children playing or an accident in the kitchen shouldn't be a problem.

Rigids do what you expect from a floor - every day.

WATER-RESISTANT AND WORRY-FREE

Rigids is 100% water-resistant vinyl flooring. Ideal for any room - from living room to bathroom* - for a seamless, stylish look throughout your home.

Whether it's a splash of water from (not in) the shower room or a spilled cocktail, Rigids can take it.

Easy to maintain, made for real life.

QUIET AND COMFORTABLE UNDER YOUR FEET

Rigids cleverly combines SPC flooring with an innovative sound-absorbing underlay. This allows you to enjoy a soft walking sensation and less ambient noise.

Our floors have up to 21 decibels of attenuation, making them the quietest floors on the market - ideal for busy families, children playing or an evening of music.

Warm on the feet, quiet in the home.

IDEAL FOR RENOVATION

Thin, strong and easy to install: Rigids is the flooring solution for renovation. They click effortlessly over virtually **any flat surface** - even old tiles. No need to remove the old floor, and no glue required.

Floating installation: just click the planks together and cut to size with a utility knife. Also fully compatible with underfloor heating.

Cut, click, done. Renovation without the hassle.
